sdmay20-26: Assurance Recipes

Week 8 Report January 20 - January 29

Team Members

Kevan Patel — Project discussion Matthew Smith — Project manager Shiwei Wang — Project discussion Qiwei Li — Programmer Garrett Harkness — Project discussion

Summary of Progress this Report

In this report period, our team has discussed the future project plan for the project. We also set up the new meeting time for this semester. For the project progress, we successfully designed the new interface for adding new shapes into the graph, and also fixed some bugs which related to the issue which happened when the data would probably not be stored into the local database.

Pending Issues

Still need to add logic of connecting two different objects together and also adding some logic of putting the objects. We still have some redundant code which need to be removed.

Plans for Upcoming Reporting Period

Remove the redundant code, add logic of layout objects and fixed bugs

Individual Contributions

Team Member	Contribution	Weekly Hours	Total Hours
Kevan Patel	Project discussion	6	
Matthew Smith	Project discussion	6	
Shiwei Wang	Project discussion	6	
Qiwei Li	Fixed bugs and improved UI	6	
Garrett Harkness	Project discussion		

Gitlab Activity Summary

Nothing to report.
