sdmay20-26: Assurance Recips
Week 10 Report
February 14 - February 27

Team Members
Garrett Harkness — *Chief Engineer*
Kevan Patel — *Report Manager*
Shiwei Wang   — *Test Engineer*
Matthew Smith — *Meeting Facilitator*
Qiwei Li — *Scribe*

Summary of Progress this Report
Last week, we met with our client Myra to show what we completed for the app and mainly did what she wants. We asked a few questions and she gave her thoughts. We decided we just need to keep working on and cleaning up creating from a template. And then adding in GSN into it and all of that stuff. We also assigned tasks out to people as well. Matthew asked her about assigning people tasks and the difficulty of that. Garrett asked her a bit about GSN and how we can structure that into our code. She also suggested looking at the current application and using what he did to get some of the things we needed team members were doing the first iteration and the first sprint, so far, we were almost finished them. We merged codes after everyone completed individually parts. Qiwei was modifying the code by using inheritance.

Pending Issues
No, We don't have project or team issues at that moment.

Plans for Upcoming Reporting Period
Team member 1: Implementing a testing environment
Team member 2: find a library to save graph as PDF or PNG locally
Team member 3:crapped the badge function and now it's just going to be an image upload on the front page where the user and upload their own badge as per request by Maya. working on cleaning up the front page to make it look more like a website rather than just a block of text.
Team member 4 :Merged code. Modify the code by using inheritance.
Team member 5: fix issue of code and how to assign people tasks on app.

Individual Contributions

Team Member	Contribution	Weekly Hours	Total Hours
Garrett Harkness	Group meeting, project discuss	6	
Kevan Patel	Group meeting, project discuss	6	
Shiwei Wang	Group meeting, project discuss	6	
Matthew Smith	Group meeting, project discuss	6	

Qiwei Li	Group meeting, project discuss	6	

Gitlab Activity Summary
Nothing to report.
