

## **sdmay20-26: Assurance Recipes**

Week 11 Report

February 28 - March 12

### **Team Members**

Garrett Harkness - *Chief Engineer*

Kevan Patel - *Report Manager*

Shiwei Wang - *Test Engineer*

Matthew Smith - *Meeting Facilitator*

Qiwei Li - *Scribe*

### **Summary of Progress:**

We only met once in this period with our client as it was a two week sprint. We asked a few questions on how she wanted the app and she gave her thoughts. We decided to split our tasks into a more individually based environment because we would not be able to meet as much together this sprint because of midterms and other assignments due. But, we did get some decent progress done but we have much to do over break. GSN was implemented into our project a bit better by Garrett and Matthew. Matthew also worked on adding some more aspects to the template regarding GSN as well as mapping shapes in the graph tab to the GSN aspects. Qiwei was working on restructuring the way the template and graph worked so both objects are similar making the project easier to work with using inheritance. Shiwei was working on exporting the graphs as pdf or png so it could be shared with others. Shiwei and Garrett were also looking into some testing for the project. Kevan worked on cleaning up the front page so it looked more like a website.

### **Pending Issues:**

We do not currently have any project or team issues at this moment.

### **Plans for Upcoming Reporting Period:**

**Garrett Harkness:** Staying on campus so he will be meeting over break to work on project with others. Will be looking into kill switch recipes and more GSN. Will be looking into testing.

**Kevan Patel:** Will be working on merging work to the main branch of the project and being able to edit text inside the nodes. Adding more features to the project

**Shiwei Wang:** Staying on campus so he will be meeting over break to work on project with others. Will be working on exporting graphs as pdf or png so it can be shared. Will be looking into testing.

**Matthew Smith:** Will be working on adding more features to the project. Will be implementing more GSN to the program.

**Qiwei Li:** Staying on campus so he will be meeting over break to work on project with others. Will be working on finishing up the inheritance aspect of the project. Adding more features to the project as well.

### Individual Contributions:

Team Member	Contribution	Weekly Hours	Total Hours
Garrett Harkness	Group meeting, project discussion, presentation, GSN	6	96
Kevan Patel	Group meeting, project discussion, presentation, cleaning up homepage	6	92
Shiwei Wang	Group meeting, project discussion, presentation, cleaning up homepage	6	96
Matthew Smith	Group meeting, project discussion, presentation, GSN/mapping	8	102
Qiwei Li	Group meeting, project discussion, presentation, inheritance	10	112

### Gitlab Activity Summary:

Nothing to report.
